**EFFICIENT  
PETROL ENGINE**

**POWERFUL  
ELECTRIC MOTORS**

**HIGH-PERFORMANCE  
HYBRID ELECTRIC BATTERY**

## SELF-CHARGING AS YOU DRIVE

Battery  
powers car

### START/LOW SPEED

Only the motor powers the whole car with electricity from the Hybrid Electric battery\*

Battery  
is charged

### NORMAL DRIVING

The engine and motor power the car together while the Hybrid Electric battery is charged.

Dual power  
for quicker  
acceleration

### HARD ACCELERATION

Petrol engine and electric motor provide maximum power together with supplemental electrical power from the HEV battery to the motor.

Braking  
charges battery

### BRAKING

The energy that is generated from braking charges the battery.

Engine auto off

### STOPPED

The engine goes off to avoid wasting fuel.

\*Toyota Hybrid Electric System will charge the Hybrid Electric battery automatically depending on the driving condition, weather and Hybrid Electric battery state of charge.

## Hybrid System

The Toyota Hybrid Electric System delivers maximum efficiency, advanced tech, and a greener future—all in one.

### Better Emissions

Corolla Cross Hybrid Electric  
CO2 Emissions: 98g/km. Toyota's hybrid system helps create a cleaner, more sustainable future by using less petrol and reducing your carbon footprint.

### Intelligent Technology

The 5th Generation Hybrid Electric System features improved battery longevity.

### Regenerative Braking

Toyota's self-charging hybrid system captures energy from braking to recharge the battery—no plug-in needed—keeping you powered without wasting energy.

# **COROLLA CROSS** *Hybrid Electric*

Drive beyond expectations with the New Corolla Cross Hybrid Electric, designed to reduce emissions with zero compromise on style, comfort, and performance.

New Front  
Grille and  
Bumper

10" Full  
Colour Multi  
information  
Display
